What to do next:

- read your material and start planning a presentation
- your presentation should contain:
  - An introduction to your serial killer (one or two ..) – the WHO, HOW, WHEN and WHERE.. the facts of the crime
  - A discussion of the possible motifs for the crimes – the WHY
  - A attempt to understand the murderer – the psychological aspect
- your presentation should be both oral (present to class) and written (write a couple of pages *in your own words*) – this will often be your script to the oral presentation but can contain more facts and details
- your presentation should use some kind of IT or audio-visual material (video-clips, powerpoint, pictures, ...)
