

## SPEECHES

You shall work with a couple of speeches:

- your job is to read the speech and hear it – make a print from American Rhetoric
- next you must summarize its content (: what is the speech about)
- find out what means the speaker uses to enhance the effect of the speech
- you must pick out a piece of it and read it out aloud
- lastly you should find and read some background material – follow the links
- - and present the whole thing in class:
  - present the speech, the speaker and the political background
  - present the main issues being discussed in the speech
  - present some of the means used by the speaker (- the technique of the speech)
  - read out a passage from the speech and explain why you chose this part of it
  - please find a couple of examples from the actual speech

find all the material and the links here:
